Breakwater

Adil Saeed Al- Harbi Est.

Breakwater

In ongoing projects, a project is underway for the breakwater material with Hyundai Heavy Industries (HHI) at Jeddah South Thermal Power Plant (JSTPP) project. Provision and supply of different breakwater material layers. Which includes Secondary armour layer and Rock primary armour layer at the project site. The hard rock stone is supplied from source quarry at Makkah to project site location. The materials supply demands the need of day and night operational work. The project is a joint venture with a sister company with name Faisal Saeed Al-Harbi Est. the project contract is directly on sister company name. Being partner the manpower and technical staff is from AS Al-Harbi Est.

Construction Work

Adil Saeed Al- Harbi Est.

Building and Structure Project:

Construction of large mega and multi bathing and washing spaces for the Hajj pilgrims in Jamrat area Makkah, the project successfully completed in 2009. The project was very tight-schedule and time-bound. The building construction work consists of concrete frame structure. Foundation, column, beams and slab all completely requires heavy steel reinforcement work, massive concrete pouring work and huge form-work and scaffolding was required for the project. The building accommodates 240 units of bathing and washing spaces, complete plumbing fitting and installation work and electrical installations, wiring, switches, boards and lights. The project was completed in a short time period of 8 months and handover to Baldiya (Municipality) Makkah. Later, after completion of the building project in the area; two pedestrian bridges were also constructed in Mina area Makkah.

Cladding and Structural Glazing

Cladding and Structural Glass is the application of one material over another to provide skin or layer intended to control the infiltration of weather elements, or for aesthetic purposes.

Adil Saeed Al-Harbi Est. has worked with a number of high profile clients, producing cladding solutions of the highest possible standard. A quality cladding service can transform the appearance and structural integrity of a building with minimal cost and time commitment. Here we use only the highest quality materials and thus offer our clients long term solutions as opposed to short term fixes, with all of our work being guaranteed in this respect.

Our experiences predominantly come from commercial buildings and thus we have expertise and knowledge obtained from working on a number of large and high profile projects. We have qualifications and certification allowing us to work to a variety of different industry specifications and standards, and always ensure the quality and effectiveness of our cladding and glass structural solutions.
